DETAILED ACTION

Status of the Application

- [1]** Claims 24-25 are pending in the application.
- [2]** Applicants' amendment to the claims filed September 02, 2003, is acknowledged.

Examiner's Amendment

- [3]** An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
- [4]** Authorization for this examiner's amendment was given in a telephone interview with Ms. Michele Cimbala on December 05, 2003.
- [5]** Cancel claims 1 and 8.

Reasons for Allowance

- [6]** The following is an Examiner's statement of reasons for allowance. The examiner can find no teaching or suggestion in the prior art directed to a method for producing L-lysine, L-threonine, and L-isoleucine by culturing a *C. glutamicum* with a disrupted 6-phosphoglucose isomerase (*pgi*) gene. It is noted that the specification discloses that disruption of the *C. glutamicum pgi* gene of SEQ ID NO:1 using an internal fragment of SEQ ID NO:1 generated by PCR amplification resulted in mutants having no detectable 6-phosphoglucose isomerase activity (see Example 2, particularly page 30, lines 8-10),

Art Unit: 1652

indicating that additional 6-phosphoglucose isomerase genes of *C. glutamicum* are not present and/or not expressed in *C. glutamicum*. In view of this evidence, the claims need not be limited to reciting a *C. glutamicum* mutant having a disrupted *pgi* gene of SEQ ID NO:1 as the single disclosed representative species of *C. glutamicum* with a disrupted *pgi* gene of SEQ ID NO:1 is representative of the entire genus of recited *C. glutamicum* cells having a disrupted *pgi* gene and undue experimentation is not required to make the entire scope of *C. glutamicum* cells having a disrupted *pgi* gene. Therefore, claims 24-25, directed to a method for producing L-lysine, L-threonine, and L-isoleucine by culturing a *C. glutamicum* with a disrupted 6-phosphoglucose isomerase (*pgi*) gene are allowable over the prior art of record.

[7] Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
